

Woven Heart Basket

by Jackie Topa

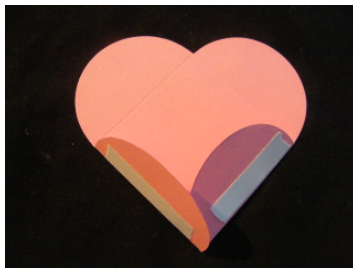

I used the pedal card big shot die to cut out my pieces. *If you don't have this die or want to vary the size of your basket, draw a square with a half circle on one end. Cut it out by hand.*

1. You will need two pieces of coordinating cardstock or Designer Series Paper 2 ¾ x 4". Run it through the big shot using the pedal card die. Leave only one rounded end and trim the other three sides along the score lines. Cut out one full pedal card for the back of your basket.

2. Make cuts in both pieces just past the score line (*as shown in photo*). You can make as many cuts as you'd like.

3. Weave the pieces together by alternating the strips over and under.

4. To make the back of your basket fold two of the pedals over and apply sticky strip. Adhere your woven front piece to the back of your basket.

5. Cut a strip of card stock or ribbon to make the handle. Attach it to the front and back of your basket.
